Transportation **25**: 421–423, 1998

CONTENTS VOLUME 25 1998

Volume 25 No. 1

PHILIP A. VITON / Changes in multi-mode bus transit efficiency, 1988–1992 1–21

SVANTE YLVINGER / The operation of Swedish motor-vehicle inspections: Efficiency and some problems concerning regulation 23–36

LAWRENCE F. CUNNINGHAM & JAMES H. GERLACH / Transportation agencies' experiences with decision support systems for airport ground access planning 37–53

PATRICK BEATON, CYNTHIA CHEN & HAMO MEGHDIR / Stated choice: A study in predictive validity using an aggregate truth set 55–75

S. C. WIRASINGHE & A. S. KUMARAGE / An aggregate demand model for intercity passenger travel in Sri Lanka 77–98

MARK BALDASSARE, SHERRY RYAN & CHERYL KATZ / Suburban attitudes toward policies aimed at reducing solo driving 99–117

Contributors to this issue 119–120

Volume 25 No. 2

Special Issue: Extending the Scope of Travel Surveys
Guest Editors: Martin Lee-Gosselin, Patrick Bonnel & Charles Raux

MARTIN LEE-GOSSELIN, PATRICK BONNEL & CHARLES RAUX / Guest editorial 121–127

TOMMY GÄRLING, ROBERT GILLHOLM & ANITA GÄRLING / Reintroducing attitude theory in travel behavior research. *The validity of an interactive interview procedure to predict car use* 129–146

PATRICK BONNEL & MICHEL LE NIR / The quality of survey data: Telephone versus face-to-face interviews 147–167

BRUNO FAIVRE D'ARCIER, ODILE ANDAN & CHARLES RAUX / Stated adaptation surveys and choice process: Some methodological issues 169–185

PETER R. STOPHER / A review of separate and joint strategies for the use of data on revealed and stated choices 187–205

THOMAS S. TURRENTINE & KENNETH S. KURANI / Adapting interactive stated response techniques to a self-completion survey 207–222

Contributors to this issue 223–224

Volume 25 No. 3

BELINDA YUEN & CHIN HOONG CHOR / Pedestrian streets in Singapore 225–242

ANNA MATAS & JOSÉ-LUIS RAYMOND / Technical characteristics and efficiency of urban bus companies: The case of Spain 243–263

SUDHIR ANANDARAO & CARL D. MARTLAND / Level crossing safety on East Japan Railway Company: Application of probabilistic risk assessment techniques 265–286

PRASHANT N. BALEPUR, KRISHNA V. VARMA & PATRICIA L. MOKHTARIAN / Transportation impacts of center-based telecommuting: Interim findings from the Neighborhood Telecenters Project 287–306

T.T. TON, J.A. BLACK & U. VANDEBONA / An object-oriented approach to transport modelling: Software development to calculate road traffic noise 307–328

Contributors to this issue 329–330

Volume 25 No. 4

ABHIMANYU BISSESSUR & FARIBA ALAMDARI / Factors affecting the operational success of strategic airline alliances 331–355

TRACY H. NEWSOME, WAYNE A. WALCOTT & PAUL D. SMITH / Urban activity spaces: Illustrations and application of a conceptual model for integrating the time and space dimensions 357–377

MART TACKEN / Mobility of the elderly in time and space in the Netherlands: An analysis of the Dutch National Travel Survey 379–393

JOHN MILTON & FRED MANNERING / The relationship among highway geometrics, traffic-related elements and motor-vehicle accident frequencies 395–413

Contributors to this issue 415–416
